

Enter your Message in three easy steps!

Netpresenter Content Management: Create, Schedule and Manage Messages with Ease

Netpresenter Message Server makes multi-channel publishing easy. Simply create, preview and manage messages in an easy-to-use web interface. Select the most effective playback formats, times and locations to get your message across.

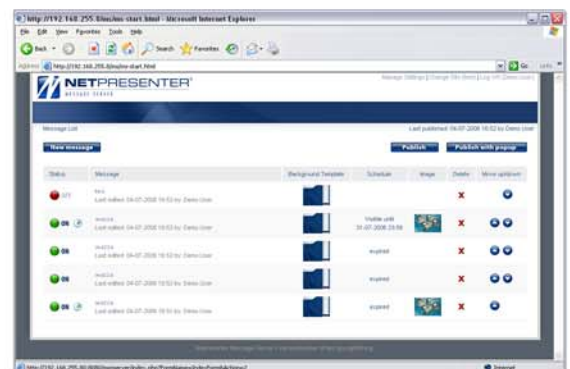

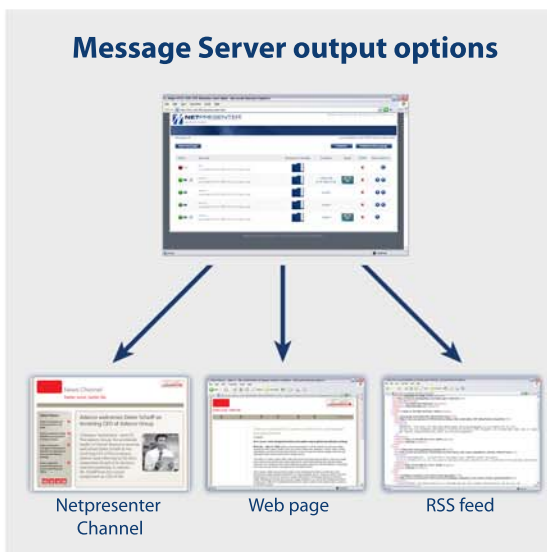

Whether it's an urgent announcement, message from the CEO or the organization's news headlines, Netpresenter Message Server gets your message across with ease.

Schedule your messages to appear as interactive screensaver, pop-up window, on the PC desktop, on a TV screen, digital display or kiosk.

Key Features

- Easy-to-use web interface
- Compact XML-based content management system
- Multi-channel, multi-format playback
- Enter, schedule and format messages
- Scheduling of playback based on time, day, month and year
